**FOR IMMEDIATE RELEASE**

## **MIR3 and INTRADO Team to Deliver Public Safety Class Notification Technology to County, City and Federal Governments**

**San Diego, California – July 26, 2005** – MIR3™, the technology leader in Intelligent Notification™ solutions, today announced it is partnering with Intrado Inc. (NASDAQ:TRDO), a global provider of integrated data and telecommunications, solutions to offer notification technology designed to meet the stringent requirements of municipal, state and federal public safety agencies.

Intrado designs emergency systems specifically for public safety. The integration of technology from MIR3 will allow Intrado to add features such as intelligent routing and call bridging to the Intrado® Target Notification services.

“MIR3’s advanced features and functionality complement our existing notification capabilities as we work together to address the exacting needs of the public safety industry,” said Monica Marics, Vice President of Wireline Products and Notification Group, at Intrado.

“MIR3 is extremely pleased that our Intelligent Notification technology passed Intrado’s rigorous testing and due diligence for integration into their existing emergency notification offering,” said Margi Schmidt, VP of Business Development at MIR3. “We look forward to working with Intrado, a market leader in public safety communications, to offer what we believe will be the industry’s the most innovative system, one which will benefit counties and cities around the U.S. and their public safety and Homeland Security initiatives.”
